## Consumer Price Index (CPI) in Kurdistan Region, February/ 2024

---

**Consumer Price Index Department**

**April / 2024**

### **Analysis of inflation rate**

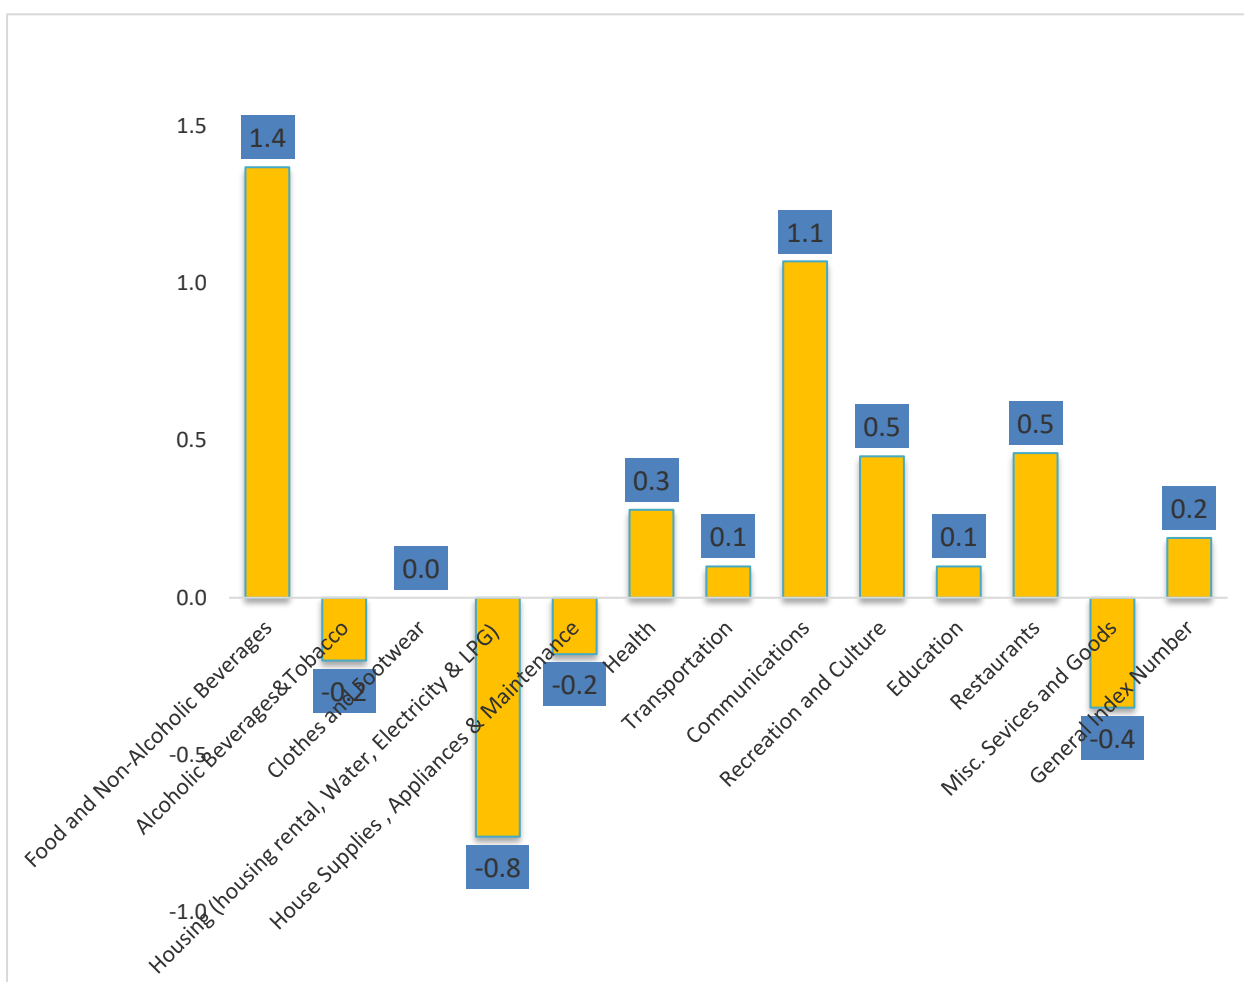

Iraq's weight has been updated for 2022 and CPI will be calculated according to this year. Previously, the results of the latest socio-economic survey that was conducted in 2012 were used to calculate the CPI. The SWIFT survey for 2017-2018 was then conducted which was relied upon to update the weights of all commodities in consumer basket by using the Morse program in the National Accounts department, which is the total household expenditure. We worked to simulate between 2012 and 2018 to achieve the weights for each of the goods used in calculating the consumer price index, in this way we could have a new weight for Iraq. On the other hand, the form of the arithmetic mean was changed to the geometric mean in order to calculate the main and subgroups and the moving basis was adopted (month-on-month), that means each month was the basis for the following month. so January 2024 was the basis for February of 2024, and then the chains were linked to produce the work with weights in 2022.
